SUMMARY

I am a BS Information Technology student at the University of Gujrat with a passion for technology and software development. I have foundational knowledge of web development, digital marketing, and mobile application development. I am a quick learner who enjoys building practical projects and continuously improving my technical skills.

KEY ACHIEVEMENTS

Academic Projects

Successfully completed multiple university projects, including a Scientific Calculator and applying programming and problem-solving skills.

Continuous Learning

Continuously improving technical knowledge through self-learning in web development, digital marketing, and mobile application development.

Quick Learner

Recognized for being a quick learner with strong adaptability, teamwork, and a willingness to learn new technologies and practical skills.

PROJECTS

Face recognition system

Developed a face recognition web application using a Multilayer Perceptron (MLP) model, enabling users to train AI models and test face recognition with real-time predictions.

Scientific Calculator

Developed with advanced mathematical operations, focusing on programming logic and user-friendly functionality.

Gym Membership Management System

Developed a Gym Membership Management System as a university project to manage member registration, records, and basic administrative operations.

SKILLS

Frontend Skills: HTML, CSS, JavaScript

Backend Skills: Node.js, C++, C#

Tools: Git, GitHub, Vs code

Digital Marketing, Graphics Designing

EDUCATION

IQRA PUBLIC MODEL HIGH SCHOOL HAJIWALA

2019 - 2021

Matriculation in Science (Biology Group)

IBN E IMAM DEGREE SCIENCE COLLEGE,
JALALPUR JATTAN

2021 - 2023

Intermediate in Pre-Medical (FSC Pre-Medical)

University of Gujrat

2023 - Present

BS Information Technology
